w/ micrometer scale settings for VTA and antiskating

black or silver gloss „Leica“ finish € 18 600

Tonearm wired w/direct-to-phono for any of our tonearms

1.2 m cable w/balanced, LEMO or RCA + € 1 950

*****NEW*****

**the Titan G.C. * Grande Complication ©* 12“ - the absolute tonearm
strictly limited edition 33 pcs - only available to distributors**

features:

- tonearm completely made from Titanium Grade 5 / Timet 1100 & aerospace magnesium further glas-pressure hardened for absolute maximized energy transfer speed
- counterweights Tungsten HD18
- **VTA** / tonearm height setting by micrometer scale **1/1000 mm – repeatable**
- **Antiskating** setting by micrometer scale **1/100 mN – repeatable**
- **Dynamic tracking force** by micrometer scale **1/100 gram - repeatable**
- **Static tracking force** setting by micrometer scale **1/100 gram – repeatable**
- **Lateral balance** setting by micrometer scale **1/100 gram – repeatable**
- **SRA** setting by microspindle– **repeatable**
- **Overhang** setting by microspindle– **repeatable**
- **Azimuth** setting by microspindle– **repeatable**

Every possible setting / alignment on a tonearm can here be set by micrometer or Microspindle with scale.

It is thus repeatable to at least 1/100 in mN/mm /gram for EVERY setting.

Thus allowing a fine-tuning of cartridge performance **never before available in this precision – and: repeatable when ever wanted!**

A true cost-no-object approach to maximize performance and adjustability of Phono tonearm to a degree and completeness never before available.

The **Titan GC** is designed to show what *is really possible* in tonearm design.

Titan GC MSRP € 69 800
